Floor light paving stones

Paver LED DESIGN

Floor light paving stones

Made using a unique Polymer compound which blends in with Paverstone's paving surfaces, these floor light paving stones feature a highly efficient, recessed LED light which is invisible from the outside. In fact, the light generated is collected within the paving stone producing an effect similar to that of optical fibres; light is transmitted outside passing through the surface as if it were transparent and radiates into the environment.

Made of a single block of non-toxic, recyclable special resin which has been coloured using natural pigments.

Resistente ai solventi

Highly-resistant to strong acids and their bases.

Resistant to solvents

Water resistant

Electric insulator

Heat resistant

No CO2 emissions

No light pollution

Low-energy consumption

Can be driven over by vehicles

Paver LED DESIGN

These floor light paving stones feature a highly efficient, recessed **LED light** which is invisible from the outside. The effect is similar to that of optical fibres and the light passes through the surface as if it were transparent, radiating into the environment.

Paver LED DESIGN

These floor light paving stones are made by using a **unique blend of special resins which blends in with PAVERSTONE's paving surfaces.**
